Senior Frontend Engineer with **+6 years of experience** specializing in scalable frontend architecture, design systems, and component library development. Expert in Angular and React with deep TypeScript proficiency, focused on building modular, maintainable codebases using feature-based architecture and advanced design patterns. Experienced in defining design tokens, component APIs, and cross-platform UI consistency across multiple products. Background spanning high-growth startups and enterprise projects, from financial compliance platforms to SaaS products, with a strong focus on product craftsmanship and user experience.

Professional Experience

Ontop

Remote

Senior Frontend Engineer (Freelance)

Nov 2021 - Present

- **Design System & Component Library:** Contributed to the development of a multi-platform design system and internal component library, defining design tokens, component APIs, and visual consistency standards across multiple products
- **Frontend Architecture:** Designed and implemented modular, feature-based architecture using standalone components, lazy loading, and code splitting strategies, reducing initial load time by 30%
- **KYC Compliance Flows:** Architected end-to-end compliance data collection interfaces with multi-step forms, custom validations, and optimized user experience for the onboarding process
- **Email Template System:** Built a scalable template creation platform powering 80% of the product's transactional emails
- **Cross-functional Collaboration:** Close coordination with design, backend, and product teams for agile deliveries and performance optimization

Stack: Angular 14+, TypeScript, RxJS, SCSS, Angular Material, Git, Jira

Freelance

Remote

Frontend Engineer

2022 - Present

- **Scalable React Architecture:** Designed and built SaaS applications from scratch using React 18 with modular architecture, Redux Toolkit for state management, and advanced component patterns (compound components, custom hooks)
- **Authentication & Security:** Implemented secure authentication flows with JWT, OAuth, and Supabase Auth, following industry best practices for session management
- **Design System Implementation:** Created reusable component libraries with consistent APIs, responsive design, and accessibility standards

Stack: React 18, TypeScript, Redux Toolkit, Vite, SCSS, Supabase, Firebase, REST APIs

GrowthMaster

Remote

Frontend Developer

Jul 2020 - Mar 2021

- **Internal CRM Platform:** Developed a client management system with interactive dashboards and data visualization using ApexCharts
- **Performance Optimization:** Implemented lazy loading and code splitting strategies, improving load times by 30%
- **Design Fidelity:** Pixel-perfect implementation of UI designs from Figma, ensuring design-to-code consistency

Stack: Angular 10, TypeScript, ApexCharts, SCSS, Figma

Preventor

Remote

UI Developer

Jul 2019 - Sep 2020

- **Compliance UI Components:** Developed complex interfaces for alert management and regulatory reporting systems
- **CSS Architecture Refactoring:** Restructured SCSS architecture reducing bundle size by 25% and improving code maintainability

Stack: Angular 8, TypeScript, SCSS, Jasmine, Karma

Key Projects

OurMemory (Angular 21 + PrimeNG + Firebase)

dev.ourmemory.app

Multi-language family SaaS with E2E encryption, GDPR compliance, and 3 pricing tiers

- **Product from Zero to Launch:** Sole developer — architected the full product with Angular 21, Firebase backend, cloud hosting, and i18n support (ES/EN/PT)
- **Custom Component Library:** Extended PrimeNG with custom design tokens defined via Stitch and Material Design, ensuring a cohesive UI across 15+ views
- **Cross-Framework Email Pipeline:** Built transactional email templates with React Email and Resend, bridging Angular and React in the same product
- **Rich Media Features:** Voice recording, timeline engine with automatic age calculation, family sharing circles, and encrypted document vault

Stack: Angular 21, TypeScript, PrimeNG, Firebase, React Email, Resend, SCSS

Snappy (React + Redux Toolkit)

app.dev.snappyhq.com

AI-powered scheduling and client management platform with payments

- **React SaaS Architecture:** Structured a modular codebase using container/presentational patterns, custom hooks, and feature-based folder organization
- **Advanced State Layer:** Redux Toolkit with normalized entities, optimized persistence, and memoized selectors for complex booking workflows
- **Third-Party Integrations:** Supabase Auth for secure sessions, Stripe API for payments, and RESTful services for AI-driven scheduling

Stack: React 18, Redux Toolkit, TypeScript, SCSS, Supabase, Stripe API

Waveless (Angular + SCSS)

waveless-aaronch.netlify.app

Pixel-perfect responsive showcase demonstrating modern Angular patterns

- **Performance-First Approach:** OnPush change detection, lazy-loaded routes, and optimized rendering across multiple breakpoints

Stack: Angular 16, TypeScript, SCSS, RxJS

Education & Certifications

Frontend Web Development | Platzi, Udemy

2019 - Present — Angular, React, Testing, Performance, Clean Code, Design Systems

Diploma in Entrepreneurship and Digital Business

Universidad Central de Venezuela | 2015 - 2016

Bachelor's Degree in Law

Universidad Santa María, Venezuela | 2010 - 2015

Additional Information

Languages: Spanish (native), English (B1) • **Availability:** Remote, hybrid in Madrid • **Tools:** Cursor IDE, Claude Code
